

Accidents Happen

Protect your valuables from theft, fire, water damage and the financial risk of unexpected injury. A Tenant Insurance Policy will help you bounce back from life's circumstances that are out of your control.

Calculate Your Assets

You can avoid the hassle of making an accurate claim when you have an inventory list of your assets. Use the checklist on the next page to take inventory of your valuables. **Get started!**

It is helpful to write down the serial numbers of valuables that can be tracked, such as computers, TV and stereo equipment and bicycles. Ask your Rayner Agencies broker for more tips on making your inventory list.
